DIAMOND BROWN

FULL-STACK WEB DEVELOPMENT | REST API INTEGRATION | TEST AUTOMATION

Atlanta, Georgia | diamondbrown.tech@gmail.com | LinkedIn: in/diamond-brown

PROFESSIONAL SUMMARY

Software Engineer Analyst with hands-on experience building and supporting enterprise web applications using React, TypeScript, C#/.NET, REST APIs, PostgreSQL, and Microsoft SQL Server. Brings additional Java and Spring Boot training, automated testing experience, production troubleshooting, and the ability to translate requirements into maintainable technical solutions.

CORE SKILLS

Web development: React, TypeScript, JavaScript, Redux, HTML5, CSS3, C#/.NET, Java, Spring Boot
APIs and data: REST APIs, JSON, PostgreSQL, Microsoft SQL Server, Oracle concepts, SQL queries, data integration
Quality and delivery: Mabl, JavaScript test automation, NUnit, regression testing, Git, Jira, Confluence, Agile Scrum
Systems and support: Application troubleshooting, Splunk, local debugging, requirements documentation, developer enablement, workflow analysis
Additional qualification: U.S. Secret clearance through Army National Guard

PROFESSIONAL EXPERIENCE

ADP | Software Engineer Analyst
February 2023 - Present

- Develop and support enterprise benefits enrollment applications using React, TypeScript, Redux, C#/.NET, REST APIs, PostgreSQL, and Microsoft SQL Server in Agile Scrum.
- Build and maintain UI features and API-connected workflows, collaborating with development and business stakeholders to understand requirements and deliver application changes.
- Participate in CI/CD delivery workflows for application changes, coordinating code, testing, and deployment activities within Agile Scrum practices.
- Investigate application issues using Splunk, SQL queries, and local debugging to isolate UI, API, and data-related behavior and support production issue resolution.
- Built reusable Mabl and JavaScript regression tests and NUnit tests for C#/.NET logic; centralized the test library with naming standards, reusable procedures, and documentation.
- Reduced developer onboarding from two weeks to three days by documenting development and environment setup in clear Confluence guides.

GemsForge | Founder and Digital Solutions Analyst
2024 - Present

- Analyze and improve small-business workflows across account access, file storage, business listings, website tools, and operational systems.
- Build structured documentation and repeatable workflows that make technical tools easier for nontechnical users to adopt and maintain.

Xpanxion / UST Step IT Up | Java Full-Stack Developer Apprentice
September 2022 - February 2023

- Completed intensive Java full-stack development training covering Java, object-oriented programming, Git, APIs, web development, and Agile workflows.
- Built a Spring Boot REST API for online I-9 form completion and served as elected team captain for project communication and team activities.

SELECTED PROJECTS

- Built and documented REST and JSON integrations between Apple Shortcuts and the Notion API, resolving header, request-body, property-formatting, and data-type issues.
- Designed spreadsheet-based relational registries using stable IDs, parent-child relationships, controlled fields, lookups, and formulas to improve data consistency and retrieval.
- Audited workflows and migrated structured information from Notion to Apple Numbers and Apple Notes while preserving content, metadata, relationships, and portability; used the resulting system to design an applied AI knowledge system with reusable project instructions, prompt patterns, governance standards, and defined categories for workflows, automations, and experiments.

LEADERSHIP AND EDUCATION

Army National Guard | Staff Sergeant and Squad Leader | May 2013 - Present - Lead training, personnel accountability, readiness, task coordination, and mission preparation.

Bachelor of Science in Criminal Justice, Minor in Psychology | Georgia State University | May 2018
Certificate of Completion of Apprenticeship, Application Developer | U.S. Department of Labor | 2023
